Things like multi-touch are quite rare and almost exclusive to more expensive Wacom tablets. There are those who say you don't pay for the brand, and there are those who say Wacom isn't the best. However, once the new line of pen display monitor by Huion, with its pro models, probably Kamvas Pro 22 will take its place on the screen Top 10.21.5 inches Full HD with 1920x1080 resolution, Gamut color 72% NTSC , Angle of viewing total 178 degrees of program expressed keys side, aIA© m of a sliding touch bar on each side. This is the eternal debate, and there is a opinion for all tastes. But being objective, we have to recognize that Wacom is a step front of other brands. Cintiq Pro 13 does. Your specifications are among the highest on the market, really on par with Wacom Cintiq 22HD, for less than half the price. Also, the color gamut of the screen on this graphic tablet is a step-up from the previous version. The digital pen has 8192 sensitivity levels per press and a rate of 266 RPS. Tilt detection One of these features has been considered "premium" for a long time and still is a feature that very few graphic tablets can brag about. Here is a summary of Huion Kamvas Pro 20 Pro's and cons : battery-free digital stylus with tilt holder. - A 19.5 inches It is a good size in most of the uses (wider than the 13 inch cintiq 13hd, without taking on as much space or being not as heavy as the cintiq 22hd). 16 buttons programmable s - A Huion There is a respectable manufacturer (2nd best-seller) A If you do not prefer to have a very large drawing surface, then you may not want to buy a 22 inch Monitor drawing instead. To finish, Kamvas Pro 20 is currently one of the strongest pen display design tablets, given its price and Check out the prices of Cintiq Pro 13 and Cintiq 13HD and tell us what you think in the comments section.
